# GAVOX

HIGHER, FARTHER, DEEPER  
LIVE YOUR DREAM

Armed Forces personnel, government officials and royalty across Europe and North America wear GAVOX, an up-and-coming watch brand created in Belgium in 2011 by Michael Happé, grandson of one of the legendary Flying Tigers.

In 2014, GAVOX officially became supplier of the 15th Wing and the 350 Squadron, two Belgian Air Force squadrons. Since then, GAVOX has been producing custom references for more than 30 squadrons and is worn by more than 700 military pilots and crew.

# OUR MISSION

TO INVITE YOU TO EXPLORE

AND ENJOY EVERY MOMENT OF YOUR LIFE

Easy to pronounce in every language, GAVOX is the contraction of the Ancient Greek word "galaxias" (our universe the Milky Way) and the Latin word "vox" (voice). The mission of Gavox (voice of our universe) is to create timepieces inspired by men and women who dare to go higher, farther and deeper.

Mission timer chronograph, aviation watch that doubles as a diving watch, state of the Art analogue computer watch... each GAVOX offers something special, unique and unexpected.

We hope that you enjoy perusing this catalogue and learning about our exciting brand!

Michael Happé, founder

The image is a vertical banner. It features a central vertical band of solid orange color. On either side of this band are two panels showing a sky at sunset or sunrise. The sky is a deep blue, and the sun is a bright, glowing orb on the left side of the left panel, casting a warm orange light across the scene. Large, dark, textured clouds are visible in the lower half of both side panels. A small, dark silhouette of an airplane is visible in the upper left of the left panel, flying towards the right.

## PILOT & AVIATION WATCHES

A Spitfire Mk Vc is shown in a steep climb, banking to the right. The aircraft is painted in a dark grey or olive drab color, with a prominent roundel insignia on the upper surface of the wing. The propeller is blurred, indicating motion. The background shows a vast, hilly landscape with green fields and small settlements under a clear blue sky.

The Gavox Spitfire was created to commemorate the Waterproof Wrist Watch that were commissioned by the British RAF after during WWII.

The Spitfire features a small second register and uses a precision quartz movement designed and built by Seiko Instruments and calibrated at 32,768 Hz. Forged in 316L stainless steel, the case is polished and features a sapphire crystal

# SPITFIRE

Pilot Watch

**SPITFIRE REF GA-SPI-226.0**

SEIKO INSTRUMENTS VD78, POLISHED STAINLESS  
STEEL CASE, CROCCO PRINT STRAP  
WATER-RESISTANT 30M/100FT

The Gavox AT-6 Texan was created to commemorate the pilots that were trained to fly with this aircraft. There was a huge needs of new pilots at the end of WWII.

The Gavox AT-6 Texan features a multifunction precision quartz movement designed and built by Seiko Instruments and calibrated at 32,768 Hz. Forged in 316L stainless steel, the case is in brushed stainless steel or bead-blaster black PVD steel, and features a mineral crystal.

# AT-6 TEXAN

Multifunction Pilot Watch

**AT-6 TEXAN REF 326.0AT6**

SEIKO INSTRUMENTS VD78, BRUSHED STAINLESS  
STEEL CASE, LEATHER STRAP

**CURTISS P-40 REF 350.1**

SEIKO INSTRUMENTS VD78, BEAD-BLASTED PVD  
STAINLESS STEEL CASE, CANVAS STRAP  
WATER-RESISTANT 50M/165FT

The Gavox Squadron draws inspiration from early 1950's pilot chronographs. It uses one of the most advanced analogue Swiss quartz movement from Ronda AG and features a sapphire crystal.

Designed and made for professional military pilots, it is also available to civilians in limited quantities. The case in 316L stainless steel can accommodate every type of strap, from nylon to rubber or leather. All Squadron stainless steel bracelets are fitted with a heavy-duty deployment clasp.

Engineered based on the input of professional pilots, the Gavox Aurora features navigational functions such as UTC time, local time, fly-back mission timer and countdown.

It was the world's first analogue quartz watch to handle all geographical and political time zones. It can display local time by increments of 15 minutes, in order to handle non-standard time zones with a difference of 15, 30 or 45 minutes. As much as 20% of the world's population lives in these non-standard time zones. The Aurora also includes astronomical features include such as a perpetual calendar and moon phase indication.

With several innovations, the Gavox Aurora is one of the most "amazing" quartz watch ever produced. The movement and user experience took three years to Gavox to develop in partnership with Soprod SA from Switzerland.

## DIVER & TOOL WATCHES

The Gavox Longitude is a tribute to the age of exploration and maritime achievements, designed for navigators and world travelers. This sophisticated timepiece features a world timer function with a rotating inner bezel that displays 24 time zones, synchronized with a sun compass. Powered by a reliable Miyota 9015 automatic movement and encased in a sturdy 41.6mm stainless steel case, the Longitude is water-resistant up to 100 meters, making it a perfect companion for any adventure.

Designed without compromise, the Gavox Avidiver offers perfect legibility and can withstand pressures up to 20 atmosphere.

We used some of the best components to make it an ideal tool watch: 316L stainless steel, sapphire crystal, screw-down crown with double o-rings, grade A PVD coating, Miyota calibre 9015, beating at 28,800 alternances per hour and integrated corrosion-proof silicone strap.

The Gavox Avidiver II GMT is a versatile diving watch featuring a dual-time GMT function and a Seiko NH34 automatic movement. Its 43mm stainless steel case and ceramic unidirectional bezel are water-resistant to 200 meters. The innovative design includes a movable glowing triangle, which can be used as a chronograph marker, countdown timer, or to track a second time zone (Zulu time), enhancing functionality for divers and travelers alike.

# MOTORSPORT WATCHES

The Gavox Roads are specifically oriented towards long distance road trips. Along with the individual serial numbers (100 of each model are available), the case backs of each edition features the engraving of a specific scenic road: the Pacific Coast Highway in California, the Atlantic Ocean Road in Norway and the Icefields Parkway in Alberta, Canada.

Each Roads watch comes with a road book that lists the places to see along the route. These watches are a perfect gift or a memento for anyone planning one of these scenic journeys.

## GAVOX FIELD TESTING

### Gavox in extreme conditions

Testing watches in extreme environments is very important to Gavox. We not only depend on the Theoretical construction parameters but also ensure **all our watches are tested individually in a laboratory**. In the field, with the help of some clients, we managed to pull out these 2 experiments

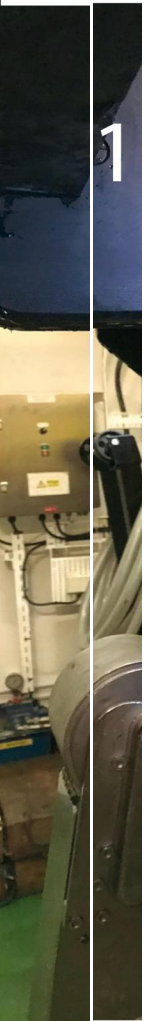

### The Gavox Avidiver under extreme pressure

We wanted to test our watch to its limit. We got the watch strapped to a Submarine Robot with the help of a gavox.

The watch was monitored and filmed during the 1970 meter dive the 20ATM rated **watch survived a 62ATM** pressure until it imploded.

The C  
on y

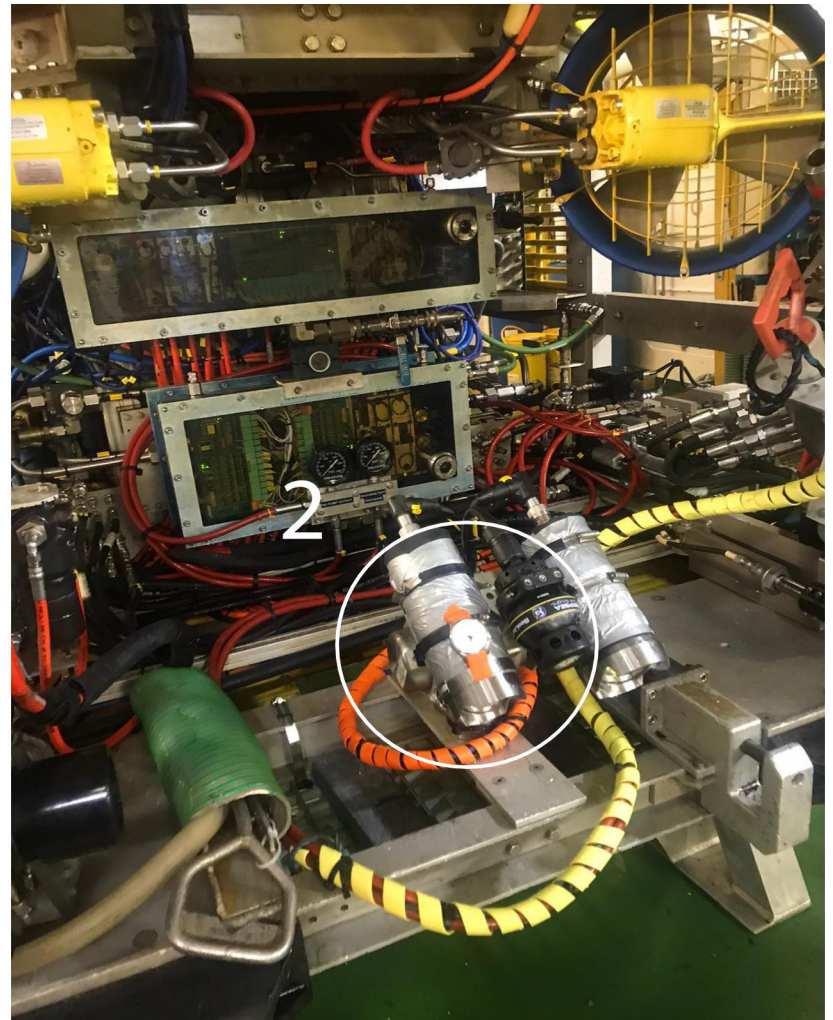

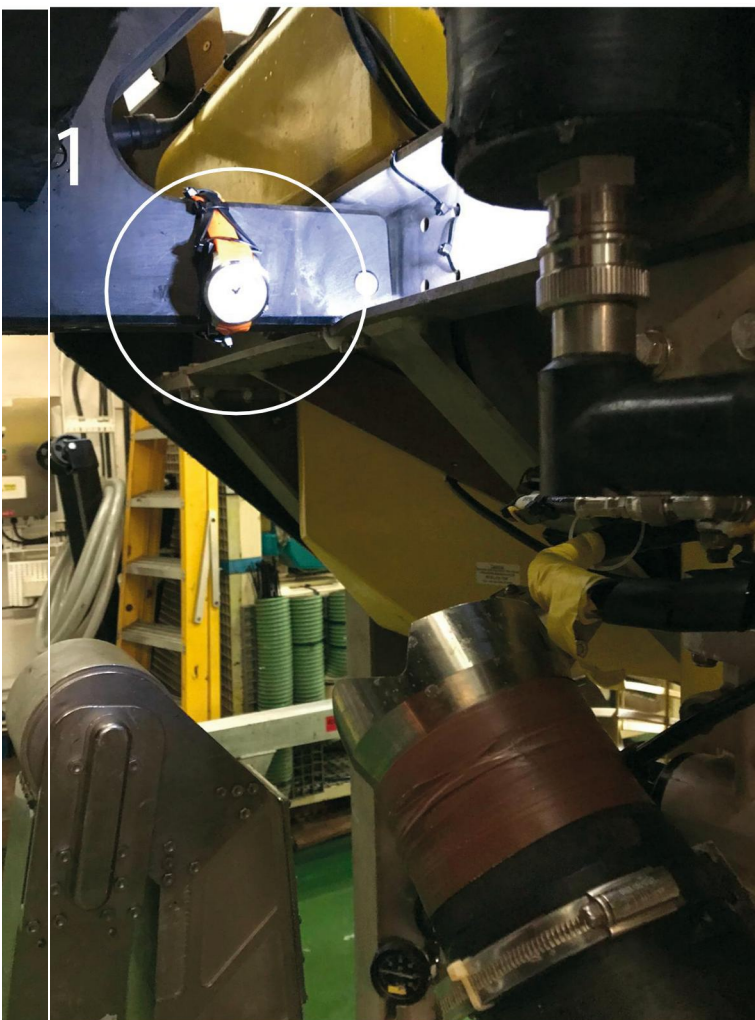

## The Gavox Avidiver After it implode

## The Gavox Avidiver on yellow submarine

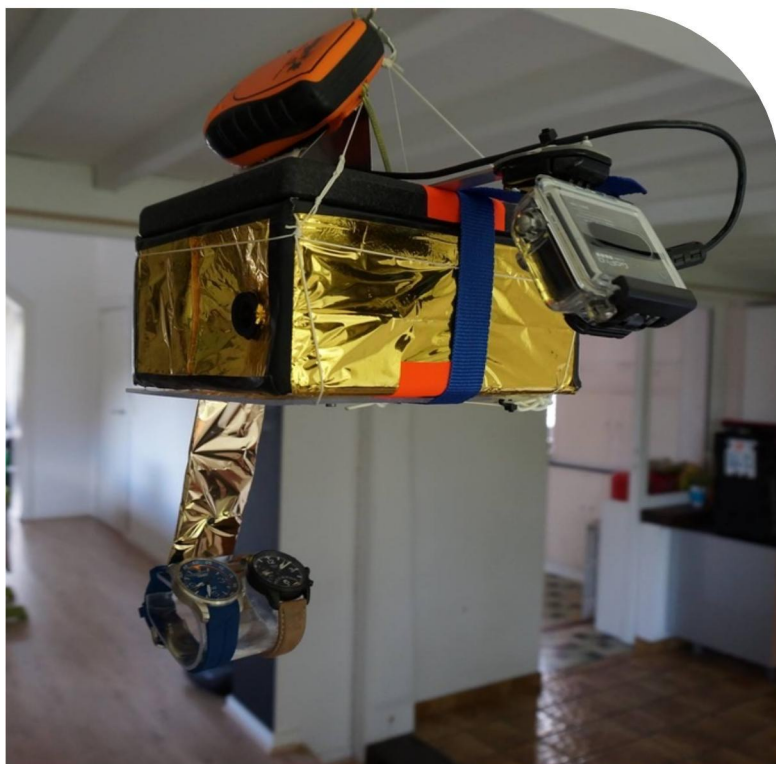

## GAVOX FIELD TESTING

### Gavox in extreme conditions

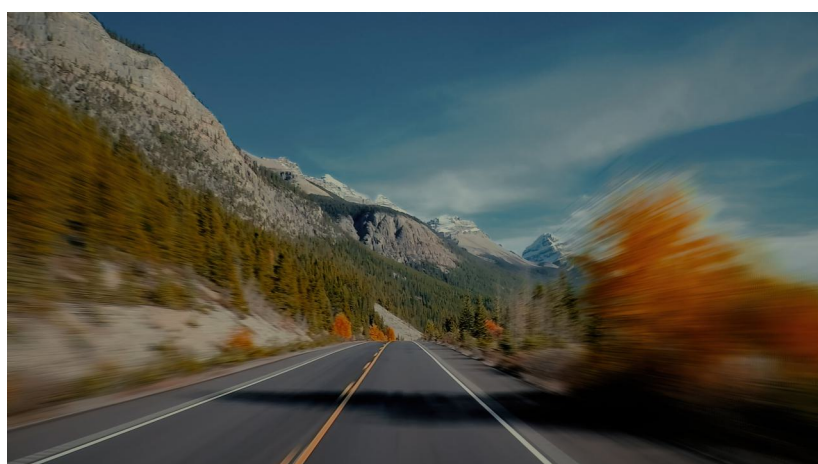

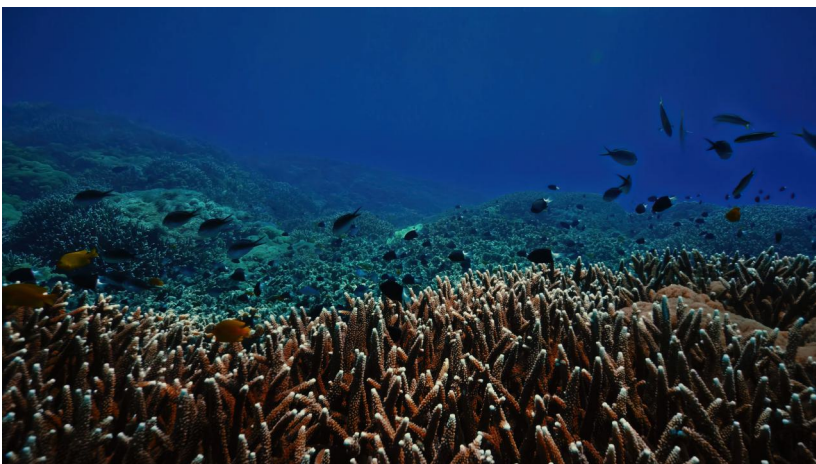

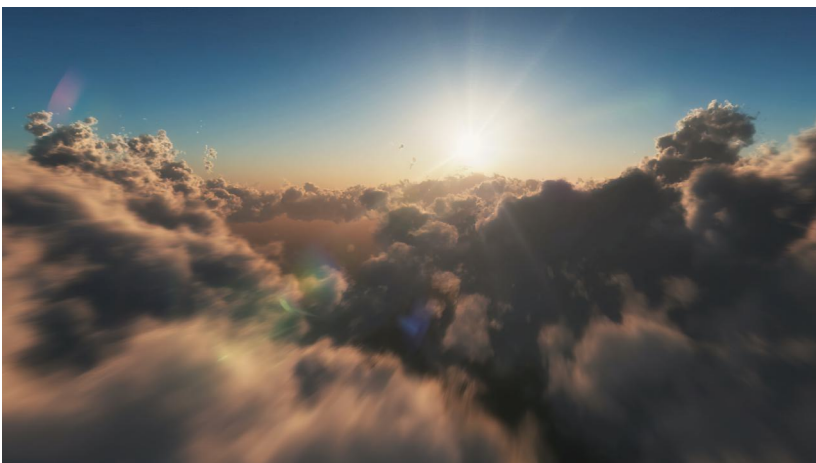

We sent an Avidiver and Aurora in the Stratosphere to test the resistance to Pressure (0.04 ATM) and Temperature (-60°C) Max altitude 35km. flight duration 3h15 Both watches were found 100km away in great shape
